Re: F.T.G. Broadcasting, Inc.
Radio Station WTLO (AM)
Facility Identification Number: 14726
Nighttime Operating Authority

Dear Counsel:

This is in reference to your letter of October 1, 2009, which responded to the staff letter of September 22, 2009, regarding the "Plan" record for nighttime secondary operation with 28 watts, pursuant to an Order to Show Cause ("OTSC") issued in MM Docket No. 87-131.

Further review of our engineering records reveals that, subsequent to the issue of the OTSC, Station WTLO relocated its transmitter pursuant to authority granted by Construction Permit BP-20080821ADG; the permit was covered by License BL-20090203AEP, granted February 24, 2009. The foregoing license authorizes nighttime operation with 27 watts, which supersedes the 28 watt operation specified in the Plan record.

The Plan record should have been removed from the database upon grant of the new license; thus, the September 22, 2009, staff letter was based on incorrect information and is hereby withdrawn. We have now corrected the database by removing the Plan record. Station WTLO remains licensed for nighttime secondary operation with 27 watts.

If there is any question in connection with this matter, please contact the undersigned.

Sincerely,

Charles N. Miller, Engineer
